DETAILED ACTION

This Office Action is a Non-Final Rejection in response to the amendment received on January 14, 2009 by **Etori**.

Response to Arguments

1. Applicant's arguments filed January 14, 2009 have been fully considered but they are partially persuasive. Applicant has now satisfied the 112 rejection requirement with respect to the standards JIS K7361-1:1997 and JIS K7136:2000, however the rejection under **Masaki** et al. (US 6505959) and **Parker** et al. (US 6752505) still stand as cited in the rejection below.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 5-8, 12-16, 20-22 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by **Masaki** et al. (US 6505959).

4. In reference to Claim 5, **Masaki** et al. shows a light control film having:

- A rough surface as one surface and a substantially smooth surface as the other surface [Figure 5: (10A)].

5. In reference to Claims 6, 13 and 20, **Masaki** et al shows:
 - A light guide plate equipped with a light source on at least one end portion thereof and having a light emergent surface approximately perpendicular to the end portion and a light control film provided on the light emergent surface of the light guide plate [Figure 5: (22, 21, 10A)].
6. In reference to Claims 7, 14 and 21, **Masaki** et al. shows:
 - The light control film is disposed so that the substantially smooth surface faces the light guide plate [Figure 5: (10A and 22)].
7. In reference to Claims 8, 15, 16, 22 and 25, **Masaki** et al. shows:
 - A prism sheet is used between the light control film and the light guide plate [Figure 5: (10B)].
8. In reference to Claim 12, **Masaki** et al. shows a light control film having:
 - A rough surface as one surface and a substantially smooth surface as the other surface [Figure 5: (10A)].
9. Claims 5-7, 12-14, 20, 21, 23 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by **Parker** et al. (US 6752505).

10. In reference to Claim 5, **Parker et al.** shows a light control film having:
 - A rough surface as one surface and a substantially smooth surface as the other surface [Figure 1: (2)].
11. In reference to Claims 6, 13 and 20, **Parker et al.** shows:
 - A light guide plate equipped with a light source on at least one end portion thereof and having a light emergent surface approximately perpendicular to the end portion and a light control film provided on the light emergent surface of the light guide plate [Figure 1: (unlabeled light guide, 26, and 2)].
12. In reference to Claim 12, **Parker et al.** shows a light control film having:
 - A rough surface as one surface and a substantially smooth surface as the other surface [Figure 1: (2)].
13. In reference to Claims 7, 14, 21 and 24, **Parker et al.** shows:
 - The light control film is disposed so that the substantially smooth surface faces the light guide plate [Figure 1: (unlabeled light guide and 2)].
14. In reference to Claim 23, **Parker et al.** shows:
 - A light source, a light diffusive plate provided on one side of the light source and a light control film provided on the side of the light diffusive plate opposite to the light source side [Figure 1: (26, 30 and 2)].
